Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a process of forming a semiconductor device, classified in class 438, subclass 692.
 - II. Claims 22-23, drawn to a device, classified in class 257, subclass 758+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as sequentially forming and patterning a first interconnect layer, depositing a first insulating layer on the first interconnect layer, etching back the first insulating layer until the first interconnect layer is exposed, forming and patterning a second interconnect layer on the first interconnect layer then depositing a second insulating layer on the second interconnect layer, etching back the second insulating layer until the second interconnect layer is exposed, repeating n times the steps of sequentially forming and patterning an interconnect layer, depositing an insulating layer on the interconnect layer, etching back the insulating layer until the lastly formed interconnect layer is exposed, wherein n is an integer number larger than 0.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and separate examination would be required, restriction for examination purpose as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ha Nguyen whose telephone number is (703)308-2706 . The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.
